Computer Engineer with full-stack development experiences across banking, financial services, and healthcare IT. Pursuing MSc Applied AI at the University of Warwick with hands-on project experience in deep learning (PyTorch/CNN), data mining, and machine learning. Seeking AI/ML Engineer or Software Engineer roles.

EDUCATION

University of Warwick – MSc Applied Artificial Intelligence | 2025-2026

Kasetsart University (Bang Khen) – BEng Computer Engineering | 2018 – 2022

WORK EXPERIENCE

Bumrungrad International Hospital | Sep 2024 – Aug 2025

Software Developer

- Engineered a digital consent platform to support clinical workflows, replacing manual paper-based consent forms and reducing paper usage.
- Reduced the witness signature processing time by 45% in the existing general consent workflow by redesigning steps and eliminating inefficiencies.
- Deployed a message queue system to manage webhook events from third parties, improving system reliability and scalability.
- Developed appointment confirmation email for patients without mobile app, including secure short url confirmation flow using C#.NET, TypeScript and Azure.
- Optimized backend features for lab checkups and updated logic for the birthday coupon feature in the mobile application using C#.NET and TypeScript.
- Performed ad-hoc investigations and backend monitoring to troubleshoot and resolve issues.

SS&C Technologies | Aug 2023 – Aug 2024

Software Engineer

- Developed an internal configuration web app (ASP.NET Core + React) to automate client-specific setup, replacing a manual process that required engineers to configure each account by hand.
- Replaced manual data entry by automating the import of 5+ legacy file formats into the database using ksh shell scripts and Java.

Siam Commercial Bank (SCB) | Jul 2022 – Apr 2023

Software Engineer

- Shipped a new card management feature in Just4U (SCB Easy, 15M+ users) using React + TypeScript (frontend) and NestJS (backend).
- Extended the backend of an internal loan document review tool (NestJS + Azure), adding document filtering and status-tracking endpoints that cut the number of manual steps per review.

MFEC Public Company Limited | Apr 2021 – Jun 2021

Software Engineering Intern

- Created a backend to ingest and filter 10,000+ Azure billing records, exposing cost breakdowns by service and resource group as time-series and visualize for customer reporting.
-

MSC PROJECTS

MSC PROJECTS – UNIVERSITY OF WARWICK | Aug 2025 – Aug 2026

- Public Health Risk Stratification: Processed a 250K+ CDC dataset using XGBoost/SMOTE for diabetes prediction, and identified 65% of undiagnosed high-risk patients via K-Means and Hierarchical clustering.
 - E-Commerce Visual Classification: Engineered a custom parameter-efficient CNN (MiniResNet) for Fashion-MNIST from scratch, achieving 92.83% accuracy and validated feature spaces using Grad-CAM and t-SNE.
 - Fetal Ultrasound Image Analysis: Evaluated ResNet-50 against ViT/EfficientNet for binary classification of fetal anomalies, balancing sensitivity/specificity and extracting interpretable insights via Grad-CAM.
 - AI Ethics & Governance Framework: Formulated an operational framework utilizing Model Cards, Datasheets, SHAP, and LIME to audit fairness, mitigate bias, and ensure EU AI Act compliance.
-

SKILLS

- **Certifications:** Microsoft Azure Fundamentals • IELTS Band 7
- **AI / ML:** PyTorch • scikit-learn • NumPy • pandas • matplotlib • seaborn • MATLAB
- **Languages:** Python • TypeScript • C# (.NET) • Java • Golang • C++
- **Cloud & Web:** Azure (APIM, Function App, App Service) • React • NestJS • ASP.NET Core • Jenkins • Git
- **Databases:** SQL Server • MongoDB • SQLite
